ABOUT THIS MODEL

The UEQ equipment trailer is built on a durable channel frame with 16" cross members. With a 14000 GVWR, the UEQ is also ideal for use as a car transport trailer. The UEQ's (Utility Equipment Trailer) payload of up to 12000 pounds means maximization of every square foot. Units are available in 7x14, 7x16, 7x18, 7x20, 7x22, and 7x24 configurations. 12 standard stake pockets, 5000# capacity load ramps and 2"x 2" bump rail ensure easy loading, unloading and security of your cargo. 16" radial tires, all LED lights, and 7000 pound capacity drop leg jack are also standard. Add optional features for this equipment trailer such as recessed d-rings, upgrade to torsion axles, and stand up ramps for more convenience. Conversion of this equipment trailer to a gooseneck is also available
